Complex Problem Solving, Customer-Centric Approach, Attention to Detail, Cross-Functional Collaboration, and deadline verbal and written communication

EXPERIENCE

Bank of Montreal, Remote- Software Developer Intern

September 2021–December 2021

Software employing HTML, CSS, JavaScript, Angular, and Node.js was developed, tested, debugged, and documented as part of the Global Money Transfer Project. Teams from different departments worked together to guarantee a smooth integration with the current systems. Angular was used for front-end development and Node.js for back-end development to complete the full-stack development process. The application's performance was increased by 20% with the aid of code optimization. Agile development methodologies were applied, along with good communication and stakeholder involvement. To find problems and guarantee code quality, code reviews were carried out.

Sankara, Remote- Application Developer Intern

May 2021–September 2021

The web app of Sankara Multicultural Cuisine was greatly improved by utilizing HTML, CSS, Flutter, and Dart. While HTML and CSS were utilized for responsive design, Flutter and Dart were employed to create the back-end components. Business stakeholders and UI/UX designers worked together to comprehend project requirements and put solutions in place. For mobile apps, Flutter and Dart were employed to provide a consistent and seamless user experience across all platforms. A user interface that was in line with Sankara's brand was created, and mistakes were found and corrected through quality assurance. Through performance improvement, the application software was documented, and the application load time was reduced by 15%. Additionally, new team members' knowledge transfer and onboarding procedures were facilitated. I received training in cross-functional cooperation, professional development, quality assurance, testing, documentation, and continuous learning.

SpryPoint, Prince Edward Island, Software Developer Intern

January 2020–May 2020

Instrumental in the creation of SpryPoint's payment system, which made use of JavaScript, HTML, CSS, and React. Their input enhanced the web program's interface and user experience. Worked with cross-functional teams to comprehend project requirements and put new features into the system that complemented company objectives. To find and fix mistakes and guarantee high-quality work, testing and quality assurance (QA) were carried out. I used CI/CD protocols for continuous deployment while working in an agile environment. SpryPoint's design criteria were followed in the creation of the user interface, guaranteeing end users an easy-to-use experience. Documentation was kept up-to-date, and processes for knowledge transfer and onboarding were supported. I participated in Agile ceremonies and regular project updates, which showed excellent cooperation and communication. Minimizing feature-related problems by 20% through extensive testing and collaboration with QA teams.

National, Calgary-Line Cook

June 2023: PRESENT

National, Calgary, Close lead

September 2023, PRESENT

Maintaining uniformity in flavor and seasoning, following food safety laws, preparing and plating menu items in accordance with predetermined recipes and serving numbers, and keeping things clean are all part of the job description. It entails prioritizing work, utilizing kitchen equipment, keeping things clean, and collaborating closely with other employees. In addition, the role entails closing and cleaning tasks, keeping abreast of menu modifications, culinary techniques, and trends, as well as mentoring and instructing junior kitchen staff as needed.

Best-Buy, Calgary- *Mobile Sales Advisor*

June 2023, - September 2023

The work includes maintaining current technology knowledge, building client connections, offering exceptional customer service, and selling mobile goods and services. I surpassed sales targets and had in-depth understanding of wearables, tablets, smartphones, and accessories. I helped customers choose the right items and educated them about mobile devices. Participated in training programs and kept up with industry developments to improve their abilities.

NURUDEEN- *Creative Director*

June 2020, - PRESENT

The portfolio development company ensured both practicality and beauty when creating user interfaces (UX) for websites and applications. I worked together with clients to comprehend design requirements and provide creative fixes. With the use of technologies like HTML, CSS, and JavaScript, they produced interactive web solutions. Portfolios effectively pitch services to prospective clients by showcasing web development and design work. Keeping in regular communication with clients, answering questions, and considering their comments for successive iterations of the design.

CIBC (Canadian Imperial Bank of Canada), Calgary- *Contact Center Rep*

March 2022, - February 2023

By answering inquiries, addressing problems, and providing solutions for banking goods and services, I displayed exceptional customer service. I helped customers select the right items, efficiently handled incoming calls and internet channels, and gave details on features, transactions, and account information. My expertise included banking products, services, and policies from CIBC. They collaborated with other departments to resolve customer grievances. By processing financial transactions following CIBC's standards and being thorough in recording their contacts and transactions with consumers, they assured accuracy and security.

Virgin-Plus, Fredericton- *Mobile Sales Advisor*

March 2022, - September 2023

The work includes maintaining current technology knowledge, building client connections, offering exceptional customer service, and selling mobile goods and services. I surpassed sales targets and have an in-depth understanding of wearables, tablets, smartphones, and accessories. I helped customers choose the right items and educated them about mobile devices. I participated in training programs and kept up with industry developments to improve their abilities.

EDUCATION

University of New Brunswick, Fredericton- ***Bachelor in Computer Science + Minor in Statistics***

September 2017 - May 2022
